ELSEVIER

Thin Solid Films 290–291 (1996) 533–540

thin solid films

Subject Index of Volumes 290–291

Absorptivity
optical and calorimetric evaluation of Z-93-P and other thermal control coatings, 278
Acoustic properties
impulsive stimulated thermal scattering for sub-micron-thickness film characterization, 294
Adhesion
improvement of the adhesion of silica layers to polypropylene induced by nitrogen plasma treatment, 68
in situ IR ellipsometry study of the adhesion and growth of plasma deposited silica thin films on stainless steel substrates, 264
effect of oxygen plasma etching on adhesion between polyimide films and metal, 367
Aging
ageing effects of thin films prepared by ion beam assisted deposition: a multi-technique characterization, 401
Alloys
physical properties of CdTe–Sb thin films, 395
AlN film
effect of a plasma protection net on residual stress in AlN films deposited by a magnetron sputtering system, 260
Aluminium
residual stress and in-situ thermal stress measurement of aluminum film deposited on silicon wafer, 248
study on d.c. magnetron sputter deposition of titanium aluminium nitride thin films: effect of aluminium content on coating, 339
Amorphous carbon
structural phase transitions of carbon observed with photoelectron spectroscopy, 148
the structure of tetrahedral amorphous carbon thin films, 317
Amorphous films
synthesis and characterization of amorphous carbon nitride films, 94
Amorphous materials
the effect of annealing on the structure of cathodic arc deposited amorphous carbon nitride films, 99
Annealing
thermochromism of rapid thermal annealed VO_2 and Sn-doped VO_2 thin films, 30
the effect of annealing on the structure of cathodic arc deposited amorphous carbon nitride films, 99
Anodic oxide
a study on the double insulating layer for HgCdTe MIS structure, 18
APCVD
optimization of SiO_2 film conformality in TEOS/O_3 APCVD, 422
Ar ion beam sputtering
the in situ characterization of metal film resistance during deposition, 283
As-doped polysilicon
evaluation of barriers for B and P diffusion into As-doped polysilicon, 485
Atomic force microscope
comparison of atomic force microscope and Rutherford backscattering spectrometry data of nanometre size zinc islands, 312
Atomic force microscopy
nanoscale mechanical property measurements using modified atomic force microscopy, 206
Attenuated total reflection fourier transform infrared spectroscopy
plasma and surface diagnostics during plasma-enhanced chemical vapor deposition of SiO_2 from SiH_4/O_2/Ar discharges, 427
Auger electron spectroscopy
multilayer reference coatings for depth profile standards, 57

B and P diffusion
evaluation of barriers for B and P diffusion into As-doped polysilicon, 485
Benzocyclobutene
multi-level interconnects for heterojunction bipolar transistor integrated circuit technologies, 435
the addition of surfactant to slurry for polymer CMP: effects on polymer surface, removal rate and underlying Cu, 447
Bias-enhanced nucleation
heteroepitaxial nucleation of diamond by bias pretreatment in an electron cyclotron resonance microwave chemical vapor deposition system, 131
structural phase transitions of carbon observed with photoelectron spectroscopy, 148
Biaxial moduli
effects of deflection on bulge test measurements of enhanced modulus in multilayered films, 243
Bis-trimethylsilylmethane
epitaxial growth of β-SiC thin films using bis-trimethylsilylmethane on Si(100) with a polycrystalline buffer layer, 181
Bond pads
adhesion studies of GaAs-based ohmic contact and bond pad metallization, 503
Boron
investigation of the field emission current from polycrystalline diamond films, 153
Boron nitride
synthesis of cubic boron nitride films using a helicon wave plasma and reduction of compressive stress, 120
BPSG
evaluation of barriers for B and P diffusion into As-doped polysilicon, 485
Buffer
epitaxial growth of β-SiC thin films using bis-trimethylsilylmethane on Si(100) with a polycrystalline buffer layer, 181
Bulge deflection
effects of deflection on bulge test measurements of enhanced modulus in multilayered films, 243

Cadmium sulphide
CdS thin film deposition by CW Nd:YAG laser, 13
Carbon
enhanced diffusion of C in Fe under CVD diamond deposition conditions, 186

Elsevier Science S.A.

Carbon nitride
synthesis and characterization of amorphous carbon nitride films, 94
the effect of annealing on the structure of cathodic arc deposited amorphous carbon nitride films, 99
ion beam deposited carbon nitride films: characterization and identification of chemical sputtering, 107
plasma diagnostic studies to the carbon nitride film deposition by reactive r.f. magnetron sputtering, 112
Carbon nitride films
investigation of carbon nitride films by cathodic arc evaporation, 103
Cathodic arcs
investigation of carbon nitride films by cathodic arc evaporation, 103
Chemical etching
optical reflectance reduction of textured silicon surfaces coated with an antireflective thin film, 23
Chemical mechanical polishing
the addition of surfactant to slurry for polymer CMP: effects on polymer surface, removal rate and underlying Cu, 447
chemical–mechanical polishing of PECVD silicon nitride, 453
effects of mechanical characteristics on the chemical–mechanical polishing of dielectric thin films, 458
Chemical sputtering
ion beam deposited carbon nitride films: characterization and identification of chemical sputtering, 107
Chemical state
effect of oxygen plasma etching on adhesion between polyimide films and metal, 367
Chemical vapour deposition
lattice disorder and texture in diamond coatings deposited by HFCVD on Co-cemented tungsten carbide, 136
fabrication of free-standing diamond membranes, 157
field emission behavior of (nitrogen incorporated) diamond-like carbon films, 171
field emission observations from CVD diamond-coated silicon emitters, 190
chemical vapour deposition of diamond at low substrate temperatures using fluorinated precursors, 196
modeling of selective tungsten low-pressure chemical vapor deposition, 406
Chemical vapour deposition (CVD)
effect of the cyclic growth/etching time ratio on the {100}-oriented texture growth of a diamond film, 161
Fe-C:H-film growth by plasma-assisted CVD from organometallic precursors, 200
Coating hardness
measurement of the hardness of hard coatings using a force indentation function, 216
Coatings
lattice disorder and texture in diamond coatings deposited by HFCVD on Co-cemented tungsten carbide, 136
field emission observations from CVD diamond-coated silicon emitters, 190
the ultimate vacuum pressure and the characteristics of sputtered coatings, 238
study on d.c. magnetron sputter deposition of titanium aluminium nitride thin films: effect of aluminium content on coating, 339
corrosion behaviour of hybrid coatings, 343
Cobalt
materials aspects of Ti and Co silicidation of narrow polysilicon lines, 473
Computer simulation
the calculation of thin film parameters from spectroscopic ellipsometry data, 40
Conductivity
transparent-conductive indium tin oxide films fabricated by atmospheric r.f. plasma deposition technique, 6
Contacts
effects of Au overlayers on the electrical and morphological characteristics of Pd/Sn ohmic contacts to n-GaAs, 417
Controlled atmosphere
pretreatment of GaAs (001) for sulfur passivation with $(NH_4)_2S_x$, 328
Copper
quantitative investigation of copper/indium multilayer thin film reactions, 518
Corrosion
corrosion behaviour of hybrid coatings, 343
Co-sputtering
transparent ZnO:Al films prepared by co-sputtering of ZnO:Al with either a Zn or an Al target, 84
Crystallization
crystallization of amorphous SiGe thin films, 464
CVD
enhanced diffusion of C in Fe under CVD diamond deposition conditions, 186
CVD-diamond
structural phase transitions of carbon observed with photoelectron spectroscopy, 148

Dealloying
encapsulation of silver by nitridation of Ag–Ti alloy/bilayer structures, 411
Debris
molecular dynamics investigations of the effects of debris molecules on the friction and wear of diamond, 211
Deconvolution
comparison of atomic force microscope and Rutherford backscattering spectrometry data of nanometre size zinc islands, 312
Density
non-destructive characterization and evaluation of thin films by laser-induced ultrasonic surface waves, 305
Deposition process
CdS thin film deposition by CW Nd:YAG laser, 13
Deposition rate
influence of oxygen on some oxide films prepared by ion beam sputter deposition, 88
Depth profiling
multilayer reference coatings for depth profile standards, 57
ageing effects of thin films prepared by ion beam assisted deposition: a multi-technique characterization, 401
Deviations
measurement of the hardness of hard coatings using a force indentation function, 216
Diamond
heteroepitaxial nucleation of diamond by bias pretreatment in an electron cyclotron resonance microwave chemical vapor deposition system, 131
optical emission spectroscopy of the plasma during CVD diamond growth with nitrogen addition, 143
investigation of the field emission current from polycrystalline diamond films, 153
fabrication of free-standing diamond membranes, 157
effect of the cyclic growth/etching time ratio on the {100}-oriented texture growth of a diamond film, 161
high sensitivity thermal sensors on insulating diamond, 165
field emission behavior of (nitrogen incorporated) diamond-like carbon films, 171
enhanced diffusion of C in Fe under CVD diamond deposition conditions, 186
field emission observations from CVD diamond-coated silicon emitters, 190
chemical vapour deposition of diamond at low substrate temperatures using fluorinated precursors, 196

molecular dynamics investigations of the effects of debris molecules on the friction and wear of diamond, 211
XPS investigation of Ti–O containing diamond-like carbon films, 323
Diamond-clad Silicon tips
enhanced electron emission from phosphorus- and boron-doped diamond-clad Si field emitter arrays, 176
Diamond film
origins of the residual stress in CVD diamond films, 254
Diamond like carbon
transformation of sp^3 to sp^2 sites of diamond like carbon coatings during friction in vacuum and under water vapour environment, 126
Dielectrics
effects of mechanical characteristics on the chemical–mechanical polishing of dielectric thin films, 458
Differential scanning calorimetry
quantitative investigation of copper/indium multilayer thin film reactions, 518
Diffraction
study by X-ray photoelectron spectroscopy and X-ray diffraction of the growth of TiN thin films obtained by nitridation of Ti layers, 376
Diffusion
enhanced diffusion of C in Fe under CVD diamond deposition conditions, 186
Diffusion barriers
evaluation of barriers for B and P diffusion into As-doped polysilicon, 485
Doping
physical properties of CdTe–Sb thin films, 395
Dry-coating
characterization of TiN films deposited onto stainless steel strips by continuous dry-coating process, 226

Effective work function
enhanced electron emission from phosphorus- and boron-doped diamond-clad Si field emitter arrays, 176
Elastic properties
non-destructive characterization and evaluation of thin films by laser-induced ultrasonic surface waves, 305
Electrical measurements
studies of phase transformations in some metal phthalocyanine thin films using measurements of current as a function of temperature, 390
Electrical properties
transparent ZnO:Al films prepared by co-sputtering of ZnO:Al with either a Zn or an Al target, 84
thin-film tantalum-nitride resistor technology for phosphide-based optoelectronics, 513
Electrical properties and measurements
effects of Au overlayers on the electrical and morphological characteristics of Pd/Sn ohmic contacts to n-GaAs, 417
Electrochemistry
corrosion behaviour of hybrid coatings, 343
Electroless nickel coating
influence of Ni–P electroless coating on the fatigue behavior of plain carbon steels, 370
Electron beam-PVD
characterization of TiN films deposited onto stainless steel strips by continuous dry-coating process, 226
Electron cyclotron resonance
heteroepitaxial nucleation of diamond by bias pretreatment in an electron cyclotron resonance microwave chemical vapor deposition system, 131
Electron energy loss spectroscopy (EELS)
the structure of tetrahedral amorphous carbon thin films, 317
Electron microscopy
the effect of annealing on the structure of cathodic arc deposited amorphous carbon nitride films, 99
Ellipsometry
the calculation of thin film parameters from spectroscopic ellipsometry data, 40
real time control of the growth of silicon alloy multilayers by multi-wavelength ellipsometry, 46
an algorithm for analyzing ellipsometric data taken with multiple angles of incidence, 51
improvement of the adhesion of silica layers to polypropylene induced by nitrogen plasma treatment, 68
electron beam deposition of ZrO_2–ZnO films, 80
in situ IR ellipsometry study of the adhesion and growth of plasma deposited silica thin films on stainless steel substrates, 264
deposition of titanium in a hollow cathode arc discharge: correlation between deposition conditions and film properties, 386
Emissivity
optical and calorimetric evaluation of Z-93-P and other thermal control coatings, 278
Energy dispersive spectroscopy
a study on the double insulating layer for HgCdTe MIS structure, 18
Epitaxial growth
formation of iron silicides on Si(110) by reactive deposition epitaxy, 525
Epitaxy
heteroepitaxial nucleation of diamond by bias pretreatment in an electron cyclotron resonance microwave chemical vapor deposition system, 131
effect of the cyclic growth/etching time ratio on the {100}-oriented texture growth of a diamond film, 161
Evaporation
thermochromism of rapid thermal annealed VO_2 and Sn-doped VO_2 thin films, 30

Fatigue resistance
influence of Ni–P electroless coating on the fatigue behavior of plain carbon steels, 370
Field emission
investigation of the field emission current from polycrystalline diamond films, 153
field emission behavior of (nitrogen incorporated) diamond-like carbon films, 171
enhanced electron emission from phosphorus- and boron-doped diamond-clad Si field emitter arrays, 176
field emission observations from CVD diamond-coated silicon emitters, 190
Field emitter arrays
enhanced electron emission from phosphorus- and boron-doped diamond-clad Si field emitter arrays, 176
Film microstructure
plasma wall interaction for TiN_x film deposition in a hollow cathode arc discharge, 381
Filtered vacuum arc
STM and XPS study of filtered vacuum arc deposited Sn–O films, 355
Finite element analysis
modelling and finite element analysis of ultra-microhardness indentation of thin films, 362
Flow-like step coverage
optimization of SiO_2 film conformality in TEOS/O_3 APCVD, 422
Fluorinated hydrocarbons
chemical vapour deposition of diamond at low substrate temperatures using fluorinated precursors, 196
Force indentation analysis
measurement of the hardness of hard coatings using a force indentation function, 216

Free energy barrier
crystallization of amorphous SiGe thin films, 464
Friction
transformation of sp^3 to sp^2 sites of diamond like carbon coatings during friction in vacuum and under water vapour environment, 126
molecular dynamics investigations of the effects of debris molecules on the friction and wear of diamond, 211

GaAs
pretreatment of GaAs (001) for sulfur passivation with $(NH_4)_2S_x$, 328
NiGeW ohmic contacts on GaAs heterostructure epitaxial layers, 493
GaAs/AlGaAs epitaxy
NiGeW ohmic contacts on GaAs heterostructure epitaxial layers, 493
GaAs contact metallization
adhesion studies of GaAs-based ohmic contact and bond pad metallization, 503
GaAs MESFET
a low-resistance Pd/Ge/Ti/Au ohmic contact to a high–low doped GaAs field-effect transistor, 497
Glow discharge
multilayer reference coatings for depth profile standards, 57
Gold alloy
adhesion studies of GaAs-based ohmic contact and bond pad metallization, 503

Hard coating
local yield map of hard coating with an interlayer under sliding contact, 221
Hardness
effects of mechanical characteristics on the chemical–mechanical polishing of dielectric thin films, 458
Heats of formation
prediction of silicide formation and stability using heats of formation, 477
Helicon wave plasma
synthesis of cubic boron nitride films using a helicon wave plasma and reduction of compressive stress, 120
Heteroepitaxial β-SiC thin film
epitaxial growth of β-SiC thin films using bis-trimethylsilylmethane on Si(100) with a polycrystalline buffer layer, 181
Heterojunction bipolar transistors
multi-level interconnects for heterojunction bipolar transistor integrated circuit technologies, 435
High dielectric constant films
tantalum pentoxide for advanced DRAM applications, 440

IBAD
ageing effects of thin films prepared by ion beam assisted deposition: a multi-technique characterization, 401
InAlAs
a study of P-type ohmic contacts to InAlAs/InGaAs heterostructures, 508
Indentation
modelling and finite element analysis of ultra-microhardness indentation of thin films, 362
Indium
quantitative investigation of copper/indium multilayer thin film reactions, 518
Indium oxide film
influence of a parallel electric field on the conductivity of a growing indium oxide film, 10
Infrared spectroscopy
transparent-conductive indium tin oxide films fabricated by atmospheric r.f. plasma deposition technique, 6
InGaAs
a study of P-type ohmic contacts to InAlAs/InGaAs heterostructures, 508
Integrated circuit technology
thin-film tantalum-nitride resistor technology for phosphide-based optoelectronics, 513
Interface structure
origins of the residual stress in CVD diamond films, 254
Interlayer
local yield map of hard coating with an interlayer under sliding contact, 221
Intermetal dielectric
plasma and surface diagnostics during plasma-enhanced chemical vapor deposition of SiO_2 from $SiH_4/O_2/Ar$ discharges, 427
Internal stress
residual stress and in-situ thermal stress measurement of aluminum film deposited on silicon wafer, 248
Ion-assisted deposition
residual stress in silicon dioxide thin films produced by ion-assisted deposition, 34
Ion beam sputter deposition
influence of oxygen on some oxide films prepared by ion beam sputter deposition, 88
Ion irradiation
structural phase transitions of carbon observed with photoelectron spectroscopy, 148
Ionized cluster beam
comparison of atomic force microscope and Rutherford backscattering spectrometry data of nanometre size zinc islands, 312
Ion plating-PVD
characterization of TiN films deposited onto stainless steel strips by continuous dry-coating process, 226
Iron substrates
enhanced diffusion of C in Fe under CVD diamond deposition conditions, 186

Laser irradiation
non-destructive characterization and evaluation of thin films by laser-induced ultrasonic surface waves, 305
Lattice parameters
lattice disorder and texture in diamond coatings deposited by HFCVD on Co-cemented tungsten carbide, 136
Light scattering
impulsive stimulated thermal scattering for sub-micron-thickness film characterization, 294
Linear elasticity
effects of deflection on bulge test measurements of enhanced modulus in multilayered films, 243
Local yield map
local yield map of hard coating with an interlayer under sliding contact, 221
Low pressure chemical vapor deposition (LPCVD)
tantalum pentoxide for advanced DRAM applications, 440

Magnetron sputtering
highly transparent and conductive $ZnO–In_2O_3$ thin films prepared by d.c. magnetron sputtering, 1
mechanical properties of hard W–C physically vapor deposited coatings in monolayer and multilayer configuration, 232
Mass spectrometry
chemical vapour deposition of diamond at low substrate temperatures using fluorinated precursors, 196
Mechanical properties
mechanical properties of hard W–C physically vapor deposited coatings in monolayer and multilayer configuration, 232

Mechanical property measurements
nanoscale mechanical property measurements using modified atomic force microscopy, 206
Mechanical stress
relaxation of mechanical stress in polyimide films by softbaking, 74
Metal adhesion
adhesion studies of GaAs-based ohmic contact and bond pad metallization, 503
Metal Insulator semiconductor
a study on the double insulating layer for HgCdTe MIS structure, 18
Metallic multilayers
effects of deflection on bulge test measurements of enhanced modulus in multilayered films, 243
Metal oxide
highly transparent and conductive $ZnO–In_2O_3$ thin films prepared by d.c. magnetron sputtering, 1
Metal phthalocyanines
studies of phase transformations in some metal phthalocyanine thin films using measurements of current as a function of temperature, 390
Metals
corrosion behaviour of hybrid coatings, 343
Methane
molecular dynamics investigations of the effects of debris molecules on the friction and wear of diamond, 211
Micron positioning
localised micro-hardness measurements with a combined scanning force microscope/nanoindentation system, 348
Microwave CVD
optical emission spectroscopy of the plasma during CVD diamond growth with nitrogen addition, 143
Modelling
modelling and finite element analysis of ultra-microhardness indentation of thin films, 362
Molybdenum
valence band photoemission study of the Ti–Mo–N system, 334
Multilayers
real time control of the growth of silicon alloy multilayers by multi-wavelength ellipsometry, 46
multilayer reference coatings for depth profile standards, 57
mechanical properties of hard W–C physically vapor deposited coatings in monolayer and multilayer configuration, 232
Multi-level interconnects
multi-level interconnects for heterojunction bipolar transistor integrated circuit technologies, 435

Nanoindentation
ion beam deposited carbon nitride films: characterization and identification of chemical sputtering, 107
localised micro-hardness measurements with a combined scanning force microscope/nanoindentation system, 348
Nanoindenter
nanoscale mechanical property measurements using modified atomic force microscopy, 206
Near edge X-ray absorption fine structure (NEXAFS)
synthesis and characterization of amorphous carbon nitride films, 94
NiGeAu ohmic contacts
NiGeW ohmic contacts on GaAs heterostructure epitaxial layers, 493
NiGeW ohmic contacts
NiGeW ohmic contacts on GaAs heterostructure epitaxial layers, 493
Nitride coatings
spectrophotometric study of oxide growth on arc evaporated TiN and ZrN coatings during hot air oxidation tests, 289
Nitrides
study on d.c. magnetron sputter deposition of titanium aluminium nitride thin films: effect of aluminium content on coating, 339
Nitrogen
investigation of the field emission current from polycrystalline diamond films, 153
field emission behavior of (nitrogen incorporated) diamond-like carbon films, 171
valence band photoemission study of the Ti–Mo–N system, 334
Non destructive methods
spectrophotometric study of oxide growth on arc evaporated TiN and ZrN coatings during hot air oxidation tests, 289
Non-destructive testing
non-destructive evaluation of thin film coatings using a laser-induced surface thermal lensing effect, 271
Nucleation
effect of the cyclic growth/etching time ratio on the {100}-oriented texture growth of a diamond film, 161
$TiSi_2$ phase transformation characteristics on narrow devices, 469

OES
optical emission spectroscopy of the plasma during CVD diamond growth with nitrogen addition, 143
Ohmic contact
a low-resistance Pd/Ge/Ti/Au ohmic contact to a high–low doped GaAs field-effect transistor, 497
Ohmic contacts
a study of P-type ohmic contacts to InAlAs/InGaAs heterostructures, 508
Optical measurements
spectrophotometric study of oxide growth on arc evaporated TiN and ZrN coatings during hot air oxidation tests, 289
Optical properties
residual stress in silicon dioxide thin films produced by ion-assisted deposition, 34
Optical reflectance
optical reflectance reduction of textured silicon surfaces coated with an antireflective thin film, 23
Oxydation
spectrophotometric study of oxide growth on arc evaporated TiN and ZrN coatings during hot air oxidation tests, 289
Oxygen
XPS investigation of Ti–O containing diamond-like carbon films, 323
Oxygen permeation
a new method for fabricating transparent barrier layers, 63
Oxygen plasma etching
effect of oxygen plasma etching on adhesion between polyimide films and metal, 367
Oxygen pressure
influence of oxygen on some oxide films prepared by ion beam sputter deposition, 88

Pd/Ge/Ti/Au
a low-resistance Pd/Ge/Ti/Au ohmic contact to a high–low doped GaAs field-effect transistor, 497
Percolative conductance
influence of a parallel electric field on the conductivity of a growing indium oxide film, 10
Phase formation
prediction of silicide formation and stability using heats of formation, 477
Phase transformation
synthesis of cubic boron nitride films using a helicon wave plasma and reduction of compressive stress, 120
Phase transformations
studies of phase transformations in some metal phthalocyanine thin films using measurements of current as a function of temperature, 390

Phase transition
transformation of sp^3 to sp^2 sites of diamond like carbon coatings during friction in vacuum and under water vapour environment, 126
Photoelectron spectroscopy
structural phase transitions of carbon observed with photoelectron spectroscopy, 148
Photoemission
study by X-ray photoelectron spectroscopy and X-ray diffraction of the growth of TiN thin films obtained by nitridation of Ti layers, 376
Photothermal deformation
non-destructive evaluation of thin film coatings using a laser-induced surface thermal lensing effect, 271
Plain carbon steels
influence of Ni–P electroless coating on the fatigue behavior of plain carbon steels, 370
Planarization
multi-level interconnects for heterojunction bipolar transistor integrated circuit technologies, 435
Plasma deposition
in situ IR ellipsometry study of the adhesion and growth of plasma deposited silica thin films on stainless steel substrates, 264
Plasma-enhanced chemical vapor deposition
plasma and surface diagnostics during plasma-enhanced chemical vapor deposition of SiO_2 from $SiH_4/O_2/Ar$ discharges, 427
Plasma parameters
plasma wall interaction for TiN_x film deposition in a hollow cathode arc discharge, 381
Plasma processing and deposition
transparent-conductive indium tin oxide films fabricated by atmospheric r.f. plasma deposition technique, 6
plasma diagnostic studies to the carbon nitride film deposition by reactive r.f. magnetron sputtering, 112
fabrication of free-standing diamond membranes, 157
Plasma treatment
improvement of the adhesion of silica layers to polypropylene induced by nitrogen plasma treatment, 68
Plasma–wall interaction
deposition of titanium in a hollow cathode arc discharge: correlation between deposition conditions and film properties, 386
Polyimide
effect of oxygen plasma etching on adhesion between polyimide films and metal, 367
Polymer
improvement of the adhesion of silica layers to polypropylene induced by nitrogen plasma treatment, 68
Polymer multilayer (PML)
a new method for fabricating transparent barrier layers, 63
Polymers
the addition of surfactant to slurry for polymer CMP: effects on polymer surface, removal rate and underlying Cu, 447
Porous silicon
optical reflectance reduction of textured silicon surfaces coated with an antireflective thin film, 23

RBS
comparison of atomic force microscope and Rutherford backscattering spectrometry data of nanometre size zinc islands, 312
Reflection high energy electron diffraction
formation of iron silicides on Si(110) by reactive deposition epitaxy, 525
Relaxation of polyimide
relaxation of mechanical stress in polyimide films by softbaking, 74
Residual stress
residual stress in silicon dioxide thin films produced by ion-assisted deposition, 34
origins of the residual stress in CVD diamond films, 254
effect of a plasma protection net on residual stress in AlN films deposited by a magnetron sputtering system, 260
Resistance
the in situ characterization of metal film resistance during deposition, 283
Resistivity
encapsulation of silver by nitridation of Ag–Ti alloy/bilayer structures, 411
Roughness
the ultimate vacuum pressure and the characteristics of sputtered coatings, 238

Scanning electron microscopy
effects of Au overlayers on the electrical and morphological characteristics of Pd/Sn ohmic contacts to n-GaAs, 417
Scanning force microscopy
localised micro-hardness measurements with a combined scanning force microscope/nanoindentation system, 348
SEM
optical emission spectroscopy of the plasma during CVD diamond growth with nitrogen addition, 143
Semiconductors
physical properties of CdTe–Sb thin films, 395
Sensors
high sensitivity thermal sensors on insulating diamond, 165
Silicides
materials aspects of Ti and Co silicidation of narrow polysilicon lines, 473
prediction of silicide formation and stability using heats of formation, 477
formation of iron silicides on Si(110) by reactive deposition epitaxy, 525
Silicon
real time control of the growth of silicon alloy multilayers by multi-wavelength ellipsometry, 46
filtered cathodic vacuum arc (FCVA) deposition of thin film silicon, 299
Silicon dioxide
plasma and surface diagnostics during plasma-enhanced chemical vapor deposition of SiO_2 from $SiH_4/O_2/Ar$ discharges, 427
Silicon micromachining
optical reflectance reduction of textured silicon surfaces coated with an antireflective thin film, 23
Silicon nitride
chemical–mechanical polishing of PECVD silicon nitride, 453
Silicon oxide
residual stress in silicon dioxide thin films produced by ion-assisted deposition, 34
in situ IR ellipsometry study of the adhesion and growth of plasma deposited silica thin films on stainless steel substrates, 264
Silver metallization
encapsulation of silver by nitridation of Ag–Ti alloy/bilayer structures, 411
SiO_2
optimization of SiO_2 film conformality in $TEOS/O_3$ APCVD, 422
Sliding
local yield map of hard coating with an interlayer under sliding contact, 221
Softbaking
relaxation of mechanical stress in polyimide films by softbaking, 74
Sputtering
plasma diagnostic studies to the carbon nitride film deposition by reactive r.f. magnetron sputtering, 112
the ultimate vacuum pressure and the characteristics of sputtered coatings, 238
effect of a plasma protection net on residual stress in AlN films deposited by a magnetron sputtering system, 260

study on d.c. magnetron sputter deposition of titanium aluminium nitride thin films: effect of aluminium content on coating, 339
physical properties of CdTe–Sb thin films, 395
Sputtering-PVD
characterization of TiN films deposited onto stainless steel strips by continuous dry-coating process, 226
Stress
effects of mechanical characteristics on the chemical–mechanical polishing of dielectric thin films, 458
Stress migration
residual stress and in-situ thermal stress measurement of aluminum film deposited on silicon wafer, 248
Sulfidation
pretreatment of GaAs (001) for sulfur passivation with $(NH_4)_2S_x$, 328
Surface morphology
effects of Au overlayers on the electrical and morphological characteristics of Pd/Sn ohmic contacts to n-GaAs, 417
Surface roughness
influence of oxygen on some oxide films prepared by ion beam sputter deposition, 88
Surface thermal lensing
non-destructive evaluation of thin film coatings using a laser-induced surface thermal lensing effect, 271
Surfactants
the addition of surfactant to slurry for polymer CMP: effects on polymer surface, removal rate and underlying Cu, 447

Tantalum nitride
thin-film tantalum-nitride resistor technology for phosphide-based optoelectronics, 513
Tantalum pentoxide (Ta_2O_5)
tantalum pentoxide for advanced DRAM applications, 440
TEOS/O_3
optimization of SiO_2 film conformality in TEOS/O_3 APCVD, 422
Testing conditions
measurement of the hardness of hard coatings using a force indentation function, 216
Tetrahedral amorphous carbon
the structure of tetrahedral amorphous carbon thin films, 317
Thermal control coatings
optical and calorimetric evaluation of Z-93-P and other thermal control coatings, 278
Thermal effect
relaxation of mechanical stress in polyimide films by softbaking, 74
Thermionic emission
high sensitivity thermal sensors on insulating diamond, 165
Thin film barrier layers
a new method for fabricating transparent barrier layers, 63
Thin film coatings
non-destructive evaluation of thin film coatings using a laser-induced surface thermal lensing effect, 271
Thin film reactions
quantitative investigation of copper/indium multilayer thin film reactions, 518
Thin-film resistors
thin-film tantalum-nitride resistor technology for phosphide-based optoelectronics, 513
Thin films
impulsive stimulated thermal scattering for sub-micron-thickness film characterization, 294
formation of iron silicides on Si(110) by reactive deposition epitaxy, 525
TiN
study by X-ray photoelectron spectroscopy and X-ray diffraction of the growth of TiN thin films obtained by nitridation of Ti layers, 376
plasma wall interaction for TiN_x film deposition in a hollow cathode arc discharge, 381
Tin oxide
STM and XPS study of filtered vacuum arc deposited Sn–O films, 355
Titanium
XPS investigation of Ti–O containing diamond-like carbon films, 323
valence band photoemission study of the Ti–Mo–N system, 334
deposition of titanium in a hollow cathode arc discharge: correlation between deposition conditions and film properties, 386
materials aspects of Ti and Co silicidation of narrow polysilicon lines, 473
Titanium nitride
ageing effects of thin films prepared by ion beam assisted deposition: a multi-technique characterization, 401
encapsulation of silver by nitridation of Ag–Ti alloy/bilayer structures, 411
Titanium silicide
$TiSi_2$ phase transformation characteristics on narrow devices, 469
Transmission electron microscopy
a study on the double insulating layer for HgCdTe MIS structure, 18
Transparent conducting oxide
highly transparent and conductive ZnO–In_2O_3 thin films prepared by d.c. magnetron sputtering, 1
Transparent conductive oxide
STM and XPS study of filtered vacuum arc deposited Sn–O films, 355
Transparent electrode
highly transparent and conductive ZnO–In_2O_3 thin films prepared by d.c. magnetron sputtering, 1
Transparent electrodes
transparent ZnO:Al films prepared by co-sputtering of ZnO:Al with either a Zn or an Al target, 84
Tungsten
modeling of selective tungsten low-pressure chemical vapor deposition, 406
Tungsten carbide
lattice disorder and texture in diamond coatings deposited by HFCVD on Co-cemented tungsten carbide, 136
Tunneling conductance
influence of a parallel electric field on the conductivity of a growing indium oxide film, 10

Ultimate vacuum pressure
the ultimate vacuum pressure and the characteristics of sputtered coatings, 238

Vacuum arc
filtered cathodic vacuum arc (FCVA) deposition of thin film silicon, 299
Vacuum arc deposition
the structure of tetrahedral amorphous carbon thin films, 317
Vanadium oxide
thermochromism of rapid thermal annealed VO_2 and Sn-doped VO_2 thin films, 30
Vickers hardness
localised micro-hardness measurements with a combined scanning force microscope/nanoindentation system, 348

Water vapor permeation
a new method for fabricating transparent barrier layers, 63
Wear
transformation of sp^3 to sp^2 sites of diamond like carbon coatings during friction in vacuum and under water vapour environment, 126
molecular dynamics investigations of the effects of debris molecules on the friction and wear of diamond, 211

X-ray diffraction
transparent-conductive indium tin oxide films fabricated by atmospheric r.f. plasma deposition technique, 6

effect of a plasma protection net on residual stress in AlN films deposited by a magnetron sputtering system, 260
X-ray fluorescence
electron beam deposition of ZrO_2–ZnO films, 80
X-ray photoelectron spectroscopy
transparent-conductive indium tin oxide films fabricated by atmospheric r.f. plasma deposition technique, 6
synthesis and characterization of amorphous carbon nitride films, 94
ion beam deposited carbon nitride films: characterization and identification of chemical sputtering, 107
XPS investigation of Ti–O containing diamond-like carbon films, 323
pretreatment of GaAs (001) for sulfur passivation with $(NH_4)_2S_x$, 328
X-ray photoelectron spectroscopy (XPS)
Fe-C:H-film growth by plasma-assisted CVD from organometallic precursors, 200
X-ray stress measurement
residual stress and in-situ thermal stress measurement of aluminum film deposited on silicon wafer, 248

Young's modulus
non-destructive characterization and evaluation of thin films by laser-induced ultrasonic surface waves, 305

Zinc oxide
a study on the double insulating layer for HgCdTe MIS structure, 18
Zinc sulfide
a study on the double insulating layer for HgCdTe MIS structure, 18
Zirconia thin films
modelling and finite element analysis of ultra-microhardness indentation of thin films, 362
ZnO:Al films
transparent ZnO:Al films prepared by co-sputtering of ZnO:Al with either a Zn or an Al target, 84
